

YUVARAJ M

Data Analyst

Chennai, Tamil Nadu, India • 9600801760 • yuvarajyuvi83@gmail.com • github.com/yuvarajm-uv

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in healthcare claims analytics — designing star-schema Power BI data models, validating large-scale claims data, and building dashboards that track claims TAT, denial rates, and cost trends — complemented by 2+ years of experience as a Research Analyst validating and reporting on large-scale financial data across global dividend and derivatives markets. Proficient in SQL, Python, and Power BI (DAX, Data Modeling, Star Schema Design), with a consistent record of maintaining 98%+ data accuracy and turning complex datasets into clear, decision-ready insights for stakeholders.

TECHNICAL SKILLS

- Data Analysis & Reporting: Data Cleaning, Validation, Reconciliation, Stakeholder Reporting
- Tools & Platforms: Power BI (DAX, Data Modeling, Dashboard Development), Excel (Pivot Tables, VLOOKUP, Advanced Formulas)
- Programming & Query: SQL (Joins, Aggregations, Subqueries, Group By, CTEs), Python (Pandas, NumPy — Data Cleaning, EDA)
- Data Architecture: Star Schema Design, SQL Server, Dimensional Modeling, Fact & Dimension Tables

PROFESSIONAL EXPERIENCE

Data Analyst (Contract) | Alfa Information Technologies

November 2025 – Present

Project: Imobisoft | Domain: Healthcare Analytics

- Design and optimize star-schema Power BI data models integrating claims systems, provider directories, eligibility files, and member databases.
- Process and validate 10M+ healthcare claims records, ensuring data accuracy and HIPAA compliance.
- Build and maintain interactive Power BI dashboards tracking Claims TAT, denial rates, readmissions, provider performance, and cost trends.
- Implement SQL and Python-based data validation frameworks to detect anomalies and duplicates.
- Perform hypothesis testing and regression analysis to evaluate healthcare program effectiveness.

Research Analyst | Exchange Data International

July 2023 – October 2025

- Analyzed 100,000+ financial records monthly covering dividends and derivatives, applying structured methods for large-scale data handling, validation, and reporting.
 - Collected, cleaned, and validated data from multiple sources, maintaining 98%+ accuracy through systematic reconciliation and cross-verification.
 - Built Excel-based dashboards and trackers to monitor financial trends and KPIs, reducing manual reporting time by ~30%.
 - Delivered weekly and monthly structured reports to 5+ stakeholders, translating raw financial data into clear, decision-ready insights.
-

PERSONAL PROJECTS

Independent projects reflecting hands-on, self-driven growth in SQL, Python, and Power BI.

India Trade Analytics Dashboard | Power BI | SQL Server | Star Schema

- Built an end-to-end trade analytics pipeline on India's import/export data (World Bank, RBI, Ministry of Commerce), producing a 978-row master dataset across Annual, Commodity, and Partner Breakdown views.
- Designed a SQL Server star schema (3 fact + 3 dimension tables) and developed a 6-page Power BI dashboard using advanced SQL patterns, including decade-level trend views and PERSISTED computed columns.
- Surfaced key insights: engineering goods and petroleum lead exports; USA, China, and UAE dominate trade flows; exports grew ~3x and imports ~4x from the 2000s to 2020s.

AI Jobs Market Analytics Dashboard | Power BI | SQL Server | Star Schema

- Built an end-to-end analytics pipeline on 1,500+ global AI job postings across 14 countries, with a SQL Server star schema (9 dimension tables, 1 fact table).
- Developed a multi-page Power BI dashboard with DAX measures for AVG Salary (\$194.89K), AI Salary Premium (10.9%), Senior Role %, and LLM Role %.
- Identified that AI Engineering leads hiring at 49% of postings, and that Big Tech pays 42% more than startups (\$238K vs \$168K).

KEY STRENGTHS

- Strong background in financial and healthcare data analytics — dividends, derivatives, and 10M+ claims records.
- Proven ability to maintain 98%+ data accuracy through structured validation, reconciliation, and process improvement.
- Skilled at translating complex data findings into clear, actionable reports for stakeholders at all levels.
- Self-driven technical proficiency in SQL, Python, and Power BI (DAX, Data Modeling, Star Schema Design).

EDUCATION

B.E. Computer Science & Engineering

Ganadipathy Tulsi's Engineering College, Vellore • Anna University

2013 – 2017
